

Capgard

Lightweight and elegant, one-piece aluminium overcaps for still wine

Capgard is a one-piece aluminium overcap that perfectly meets contemporary packaging needs by striking a balance between tradition and a demand for lighter materials. More affordable than tin, it offers the same visual appearance and premium design opportunities.

Features

- Aluminium
- One-piece
- Thinner aluminium used in opening area (safety)
- Same decoration techniques as for tin capsules
- Same capping machine used as with tin
- Preformed shoulders / Separation ring

Key benefits

- Lightweight
- Safer opening than competitors
- Same visual appearance as tin and more affordable
- Sophisticated design options with broad spectrum of colours and finishes to support brand position
- Elegant finish when capped due to preformed shoulders

Applications

Wine

Packaging process
