ENGINEERING YOUR SUCCESS.

# Focused on Adding Value to Your Business

Improving quality and control

Supported by innovative products, state-of-the-art technical facilities and a specialized international team, Parker domnick hunter's capability is based on understanding the specific needs of your business and providing a total solution.

## Delivering value from source to bottle

The Purecare programme represents a joint approach to beverage processing to review and manage your entire process. The Purecare package incorporates up-front consultation & assessment to establish your overall goals as well as a range of after sales packages that ensure the Parker domnick hunter solution is working at maximum efficiency. Purecare takes into account all aspects that affect your process, making small changes that can lead to big results.

## Purity that goes beyond filtration

Developing solutions that support quality in every aspect of your process make us a truly unique supplier who can deliver complete purification of your liquid and gas applications enabling you to have confidence and assurance in the quality of your final product.

## Global support

Part of the \$10 billion Parker Hannifin corporation, we have subsidiaries in 25 countries worldwide with nine manufacturing locations, so we can offer you truly global support with a local perspective and expertise.

## Committed to process improvements

Our goal is to continually improve your productivity, reduce your process costs and ensure the safety of your final product. Parker domnick hunter commit to your goals through:

- Continued investment in research & technology
- Application driven approach to new products
- Market & geographical experience leading to tailored solutions
- Global network providing technical, service and sales support
- Excellent reputation gained through working with the worlds leading beverage companies
- Highly skilled, experienced and trained employees

**Remote Monitoring Assessment**

- Monitor system parameters
- Highlights problems & unexpected changes
- Both customer and Parker domnick hunter support team monitor performance

**Nitrogen Generation**

- Generate your own gas
- Consistent flow, pressure and purity
- Cost saving of up to 90%
- Improves safety
- Increases efficiency
- Applications include:
  - Pressure transfer
  - Blanketing
  - Purging
  - Sparging
  - Filling

**Sterile Gas & Vent Filtration**

- TETPOR & BIO-X range of filters
- PTFE media
- Assured biosecurity

**Compressed Air Purification**

Direct and indirect contact between compressed air and ingredients, packaging or product may lead to contamination. BRC / BCAS code of practice for food / beverage grade compressed air protects food / beverage manufactures and bottlers. Parker domnick hunter as market leaders provide a complete solution that will remove a potential of 10 contaminants from up to 4 different sources.

- Water separators
- Coalescing filters
- Adsorbion filters
- Refrigeration dryers
- Dust removal filters

**CO<sub>2</sub> Polishing**

The PCO<sub>2</sub> system is designed as a quality incident protection unit acting as a point of use vapour 'polisher' and is proven to be effective at removing a wide range of potential CO<sub>2</sub> impurities, such as Benzene, Acetaldehyde & Hydrogen Sulphide.

Under HACCP principles, the quality of CO<sub>2</sub> used at the point of carbonation is defined as a Critical Control Point (CCP) and the installation of PCO<sub>2</sub> system at this point will form part of a complete CO<sub>2</sub> quality approach.

**Silt Density Index (SDI) Testing**

An evaluation of suspended particles and colloids in the water, based on the rate of blockage of a test membrane. Samples are taken over a given period of time to provide an indication of the performance of various treatment stages and the effect on water quality due to seasonal variation.

- Disc trial carried out over 15 minutes
- Multiple samples taken
- Periodic testing to monitor seasonal trends

**Pre-stabilization**

- PREPOR range of prefilters
- Polypropylene & glass fibre media
- Bioburden reduction & clarification
- Extend life of membrane filters

**Microbial Stabilization**

- BEVPOR range of final filters
- PES membrane
- Removal of colloids
- Bioburden stability

**Steam**

- Culinary grade steam
- Steam to meet (3A Standard 609-03)
- Protects pipe-work, equipment and downstream filters

**Carbon**

- Activated carbon
- Chlorine and chloroform reduction

**Filter Integrity Testing**

Integrity testing of sterile grade filters is a fundamental requirement of critical process applications ensuring the biological safety, quality and shelf-life of the product that reaches the customer. Parker domnick hunter provide a range of instruments suitable for beverage applications providing a test protocol that fits well into a HACCP framework.

- Aerosol challenge of sterile air filters
- Pressure decay testing of membrane filters

**Clarification**

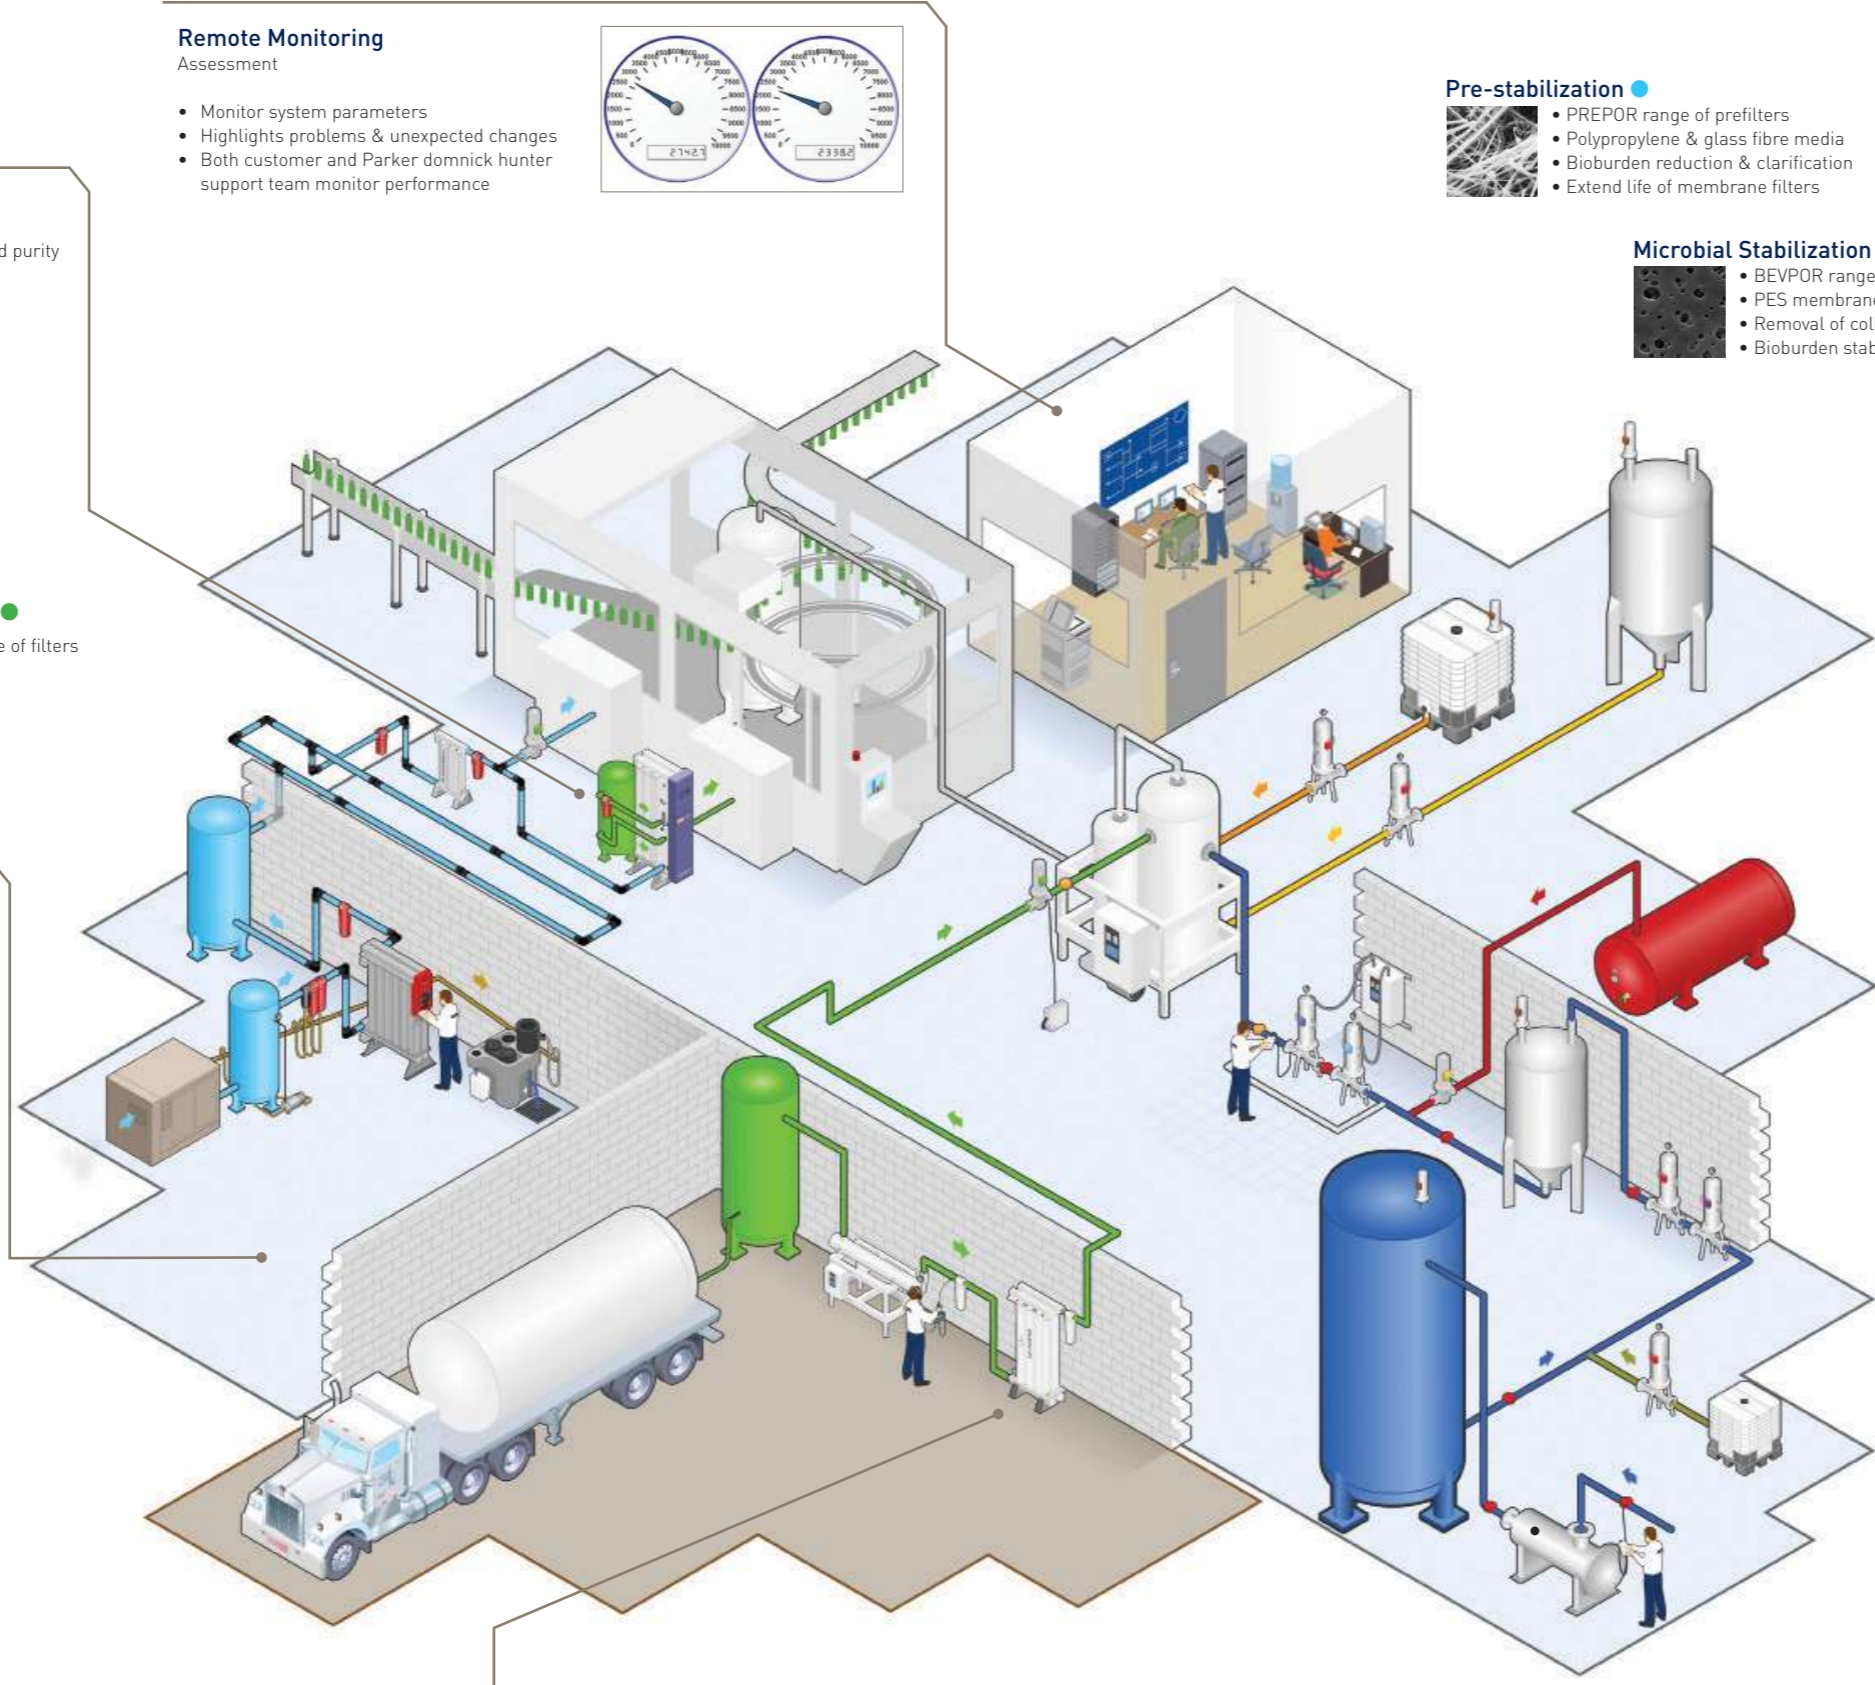

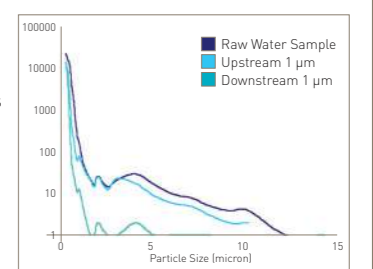

- PEPLYN range of liquid filters
- Polypropylene media
- Effective particulate removal
- Available in large format diameters

**Particle Size Analysis (PSA) Testing**

PSA is a measurement of particle size distribution in water samples using a laser particle counter either on-site or in a laboratory environment. PSA can give an indication of the expected workload of a filter system.

- Helps identify the need for more effective prefiltration protecting downstream membranes

# Products

## BEVPOR

### Final Stabilization

The BEVPOR PES range of filters from Parker domnick hunter provides microbial stabilization that extends shelf-life, whilst maintaining colour and flavour of the final product.

- 0.2 - 1.2 microns
- PES membrane filters
- Regeneration for extended service life
- Bioburden stability

## PEPLYN

### Clarification & Prefiltration

The PEPLYN range of filters from Parker domnick hunter utilizes a graded density polypropylene depth media providing high dirt holding capacity with high flow rates.

- 3 to 100 microns
- Large diameter format PEPLYNMAX
- Excellent particulate retention

## PREPOR

### Pre-Stabilization

Prefiltration liquid filters that provide high efficiency removal of spoilage organisms and yeast removal, providing economic stabilization of your product and protection to final membrane filters.

- 0.6 to 1.5 microns
- Available in glass fibre and polypropylene media
- High filtration area
- High dirt holding capacity

## CARBOFLOW

### Carbon Filters

Activated carbon filters are offered in both high efficiency and general grades. Utilizing FDA approved materials they are ideal for chlorine reduction.

- Available in 2 grades
- 5" to 40" lengths
- Excellent adsorptive capacity

## STEAM

### Culinary Grade

Sintered & plated steam filters from Parker domnick hunter are designed to provide culinary grade steam. That protects pipe-work, equipment and downstream filters. The 1 micron version guarantees steam to [3A Standard 609-03]

- 1 to 25 microns
- Re-cleanable 316L stainless steel
- Exceptionally high flow rates
- Jumbo version for increased capacity

## TETPOR AIR

### Air / Gas Filters

TETPOR AIR sterilization filter cartridges offer exceptional filtration performance whilst providing the highest levels of biosecurity throughout the process industry.

- High voids volume PTFE membrane
- Assured biosecurity with absolute rated filtration
- High flow rates with low pressure drops
- Steam sterilizable to 142 °C (287.6 °F)
- Unique prefilter layer

## BIO-X

### Air / Gas Filters

BIO-X II air sterilization filter cartridges utilize a borosilicate glass microfibre media. This media has proven to be particularly effective in the removal of sub-micron particles as small as 0.01 micron, therefore ensuring the removal of all micro-organisms including bacteria and viruses.

- High temperature operation 200 °C (329 °F)
- Robust construction

## HOUSINGS

### Liquid & Gas

Parker domnick hunter have a range of single and multi-round cartridge housings, designed specifically for use in food and beverage applications. Housings are available in both standard and plus versions to suit individual application requirements.

- Multi-element liquid housings 3 to 30 round
- Industrial vent housings
- Flow efficient sanitary air housings

## INTEGRITY TEST EQUIPMENT

### Liquid & Gas

Parker domnick hunter have a range of instruments that have been specifically designed for your industry. All instrumentation is supported by our global team of service engineers and support technicians.

- VALAIRDATA II Aerosol challenge testing of sterile gas filters
- BEVCHECK Hand held unit testing pressure decay of membrane filters
- BEVCHECK PLUS Built-in printer provides printed test report

## MIDIGAS & MAXIGAS

### Nitrogen gas generators

Nitrogen gas generators produce on-site nitrogen gas from compressed air and are the cost-effective alternatives to traditional nitrogen sources for multiple applications. Excellent energy efficiency and a low life-cycle ownership cost facilitate considerable cost savings of up to 90%.

- Low life-cycle ownership cost and elimination of costs associated with a cylinder supply
- On-demand functionality limits waste
- Energy efficient; operates from a small compressor

## WWS WATER SEPARATORS

### Bulk liquid removal

Providing efficient bulk liquid removal at all flow conditions, OIL-X EVOLUTION WS Water Separators also minimize energy consumption and help reduce your carbon footprint.

- Tested in accordance with ISO8573.9
- Performance independently verified
- Low pressure loss / low operational cost

## OIL-X EVOLUTION

### Compressed air filters

Providing air quality that meets or exceeds the requirements of ISO8573-1, the international standard for compressed air quality, OIL-X EVOLUTION is also the most energy efficient compressed air filter in the world, helping to reduce your carbon footprint.

- The most energy efficient filters available
- High quality ISO8573.1:2001 compressed air
- Running costs that start low and stay low

## PNEUDRI

### Desiccant dryers

Providing water vapour removal in accordance with Classes 1, 2 & 3 of ISO8573-1 the international standard for compressed air quality, PNEUDRI modular compressed air dryers offer unrivalled performance, flexibility and expandability in a unique space saving design. Low operational costs and integrated energy management systems also ensure energy consumption is kept to a minimum.

- Highest quality air
- Totally stops corrosion / damage
- Low installation costs
- Energy efficient

## HYPERCHILL

### Precision chilled water

Hyperchill maximizes productivity and minimizes costs, as well as easy conformity to regulations on water quality. Hyperchill is the perfect solution to industrial chilled water needs.

- Increases productivity, reduces costs
- Adaptable to individual customer needs

## PCO2

### Carbon dioxide polishing systems

Providing quality incident protection for beverage grade carbon dioxide, PCO2 offers protection against carbon dioxide contamination and impurities of up to 10 times the allowable levels.

- Ensures compliance with quality guidelines published by the International Society for Beverage Technologies (ISBT)
- Protects drinks manufacturing processes from vapour impurities
