

# TAN'COR®

Preparation of proanthocyanidic and ellagic tannins, using LAFFORT®'s instant dissolving process (IDP), for use in red wine maturation.

*Qualified for the elaboration of products for direct human consumption in the field of the regulated use in oenology. In accordance with the current EU regulation n° 2019/934.*

## SPECIFICATIONS AND OENOLOGICAL APPLICATIONS

TAN'COR® combines the properties of ellagic and proanthocyanidic tannins specifically prepared for the treatment of red wines after fermentation or during maturation. TAN'COR® is recommended for:

- Protecting the wine against oxidation phenomena.
- Red wines presenting a tannin imbalance and/or weak structure.
- Inhibits Laccase activity.
- Improve clarification.

Aspect .....	granulated	Colour .....	dark brown
Solubility in water .....	complete		

## CHEMICAL ANALYSIS

Total phenolics (%) .....	> 65	Iron (ppm) .....	< 50
Humidity (%) .....	< 10	Lead (ppm) .....	< 2
Ash (%) .....	< 5	Mercury (ppm) .....	< 0.5
Insoluble substances (%) .....	< 5	Cadmium (ppm) .....	< 0.5
Arsenic (ppm) .....	< 3		

## PROTOCOL FOR USE

### DOSAGE

- Clarification additive: 10 - 30 g/hL (100 - 300 ppm).
- Stabilises colour: 20 - 40 g/hL (200 - 400 ppm).
- Inhibits Laccase activity: 30 - 80 g/hL (300 - 800 ppm).

*l'œnologie par nature*

## IMPLEMENTATION

During the first wine racking, after malolactic fermentation or at any stage during maturation.

Thanks to the IDP procedure, TAN'COR® can be sprinkled directly onto the wine during homogenisation or a pump-over.

After the addition of TAN'COR®, it is recommended to carry out normal rackings until fining or bottling preparation.

It is recommended to add TAN'COR® at least two weeks before bottling.

## STORAGE RECOMMENDATION

- Store above ground level in a dry area not liable to impart odours. Ensuring stock is kept at a moderate temperature, in its original, unopened packaging.
- Optimal date of use: 5 years.

## PACKAGING

1 kg bag - 10 kg box.  
5 kg bag - 10 kg box.
