#3/13

In conformity to Regulation (EU) 2020/878

#### 2.3. Other hazards

The substance / mixture does NOT contain substances PBT/vPvB according to Regulation (EC) No 1907/2006, Annex XIII

Depending on the use and handling (milling, drying, packaging), dust can be generated in the environment. The powder contains respirable crystalline silica. Inhaling dust containing crystalline silica over a long period of time can cause adverse effects on the lungs. Crystalline silica (cristobalite) is a known cause of silicosis, a progressive and in some cases very serious lung disease. Perlite contains less than 0.1% crystalline silica. Using the product in the manner indicated minimizes the risk of exposure to respirable crystalline silica.

Do not ingest - Keep out of reach of children

Not ecotoxic. Use according to good working practices, avoiding product dispersion
